Special Session Title:

Advances on Electrical Engineering/Electronics, Computer, Telecommunications and Information Technology and Applications

Description:

This organized session aims to promote exchange of ideas between RMUT and ECTI researchers on latest trend on advances on electrical engineering/electronics, computer, telecommunications and Information technology as well as engineering applications. The topics include, but not limited to, power system analysis, electric drives, power converters, IIoT and IoT platform applications, linear and nonlinear control systems, hardware and software implementation, system integration of automation systems, machine learning and deep learning algorithms, performance monitoring, Industrial applications and other related topics. All who are interested in the advances on electrical engineering/electronics, computer, telecommunications and Information technology are welcome to submit papers to this special session. We hope that this session makes opportunity for exchange of ideas in various topics.

Special Session Co-chairs:
Assoc.Prof. Dr. Uthen Kamnarn
Email: uthen@rmutl.ac.th
Rajamangala University of Technology Lanna (RMUTL), Thailand

Asst.Prof. Dr. Anon Namin
Email: anamin@rmutl.ac.th
Rajamangala University of Technology Lanna (RMUTL), Thailand
